Infant & Early Childhood Services (IECS)

How is your keiki growing?

Ages & Stages Developmental Screener

For keiki ages 0–3 and 3–5½

The Ages & Stages Questionnaires (ASQ) are a simple way to check in on your child's development from home. You may already know them from visits with your child's pediatrician.

ASQ-3
Follows your child's overall developmental progress

ASQ:SE-2
Focuses on your child's social-emotional progress

You know your child best. Your answers are based on what you see your child doing today.

How it works

1. Find your child's age group below.
2. Scan both codes. Completing both questionnaires gives you the fullest picture.
3. See your results right away, plus a printable handout of activities for your child's age. A copy is sent to our office automatically.

Find your child's age group

0–3
Birth to age three
